

# DEUTER 32066 TRANS ALPINE 30 PACK

**£64.99 JIM WALKER** [www.jimwalker.co.uk](http://www.jimwalker.co.uk)

With its cavernous 30litre capacity, you'll have no trouble fitting everything you'll need for epic days out into Deuter's new pack. An internal zip separates the main compartment in two, creating a smaller section that can also be accessed externally – very handy for quick access to tools or stashing wet gear. There's two smaller pocket as well.

Two sidemesh pockets are ideal for extra water bottles or food on the go and there are also nifty extra mesh zippered pockets in the waist strap. It's hydration compatible, and can hold a large bladder. You'll have to buy this separately, but the price of the bag alone is very reasonable, so it's still great value.

The piggy-backed elastic helmet carrier is great. Its wide range of adjustment can carry anything from your XC lid to a full face bruiser, or stash your pads to the top of the hill. Build quality is tough and the Air Stripe back panels provide decent airflow and plush comfort. The main straps are adjustable for a great fit, and the well-designed clasps hold everything in place. There's even a rain cover built in, although it's very bright! *Jamer*

#### MBUK VERDICT

Perfect off the bike, or for epic rides and those who like a larger pack stuffed with features
