

CAMPAGNOLO RACING THERMO TXN

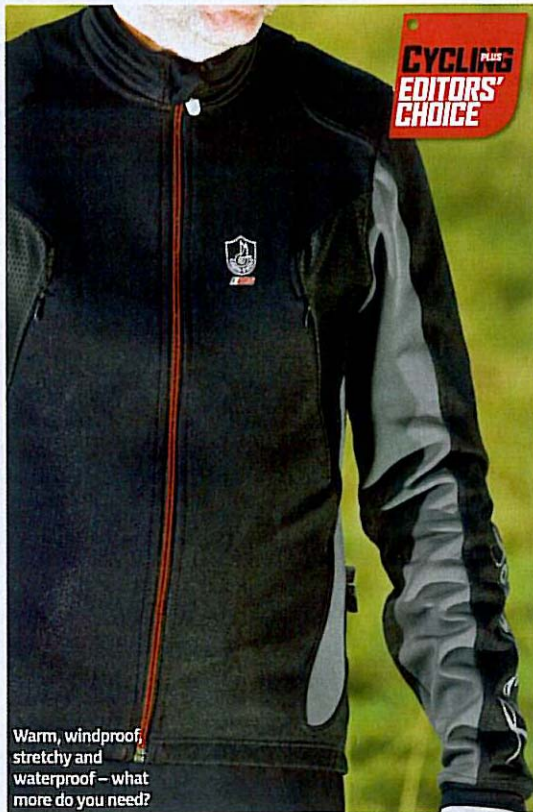

£174.99 Make winter warmer

THIS IS A fabulous jacket for a whole range of off-season conditions. Made from Campag's Thermo Textran fabric, it's windproof, warm enough for even the coldest rides and very stretchy in all directions, so you get a body-hugging fit without any tightness. It's also surprisingly waterproof; rain can seep in through the seams but it has to be very wet before anything gets through the fabric itself. You get a ton of breathability to stop things getting uncomfortable when you work up a sweat, while zipped vents on either side of the chest help out the front zip when you want extra cooling. The close-fitting neck has a fleecy inner face and a chin guard for plenty of comfort, while the stretchy hem and cuffs stop any cold air slinking in uninvited. Whopping great reflective logos on the back and arms really can't be missed when you're riding at night and the zipped rear pocket is a handy finishing touch. We love it.
